Gang Rip Saw Outfeed
Material Handling Systems

Reduce Labor and Rejects
Increase Efficiency and Profits

Mereen-Johnson manufactures a complete line of gang rip saw outfeed systems to reduce your labor costs and minimize the potential for part mishandling and damage.

Heavy duty welded tube/channel frame construction featuring C55 industrial rooftop chain with replaceable UHMW guides. Lower return guides have V tracking for extended chain life. Drive and idle sprockets are dual bearing mounted.

Outfeed driven nip rolls can reduce quality of cut issues by providing proper support and containment of material throughout the cutting process.

All systems are custom designed, fully assembled, and tested at our factory assuring a quick, easy, hassle free installation.

Contact us today to see how a Mereen-Johnson outfeed system can improve your business.
